EDUCATION

Rowan University (Glassboro, NJ) **Expected May 2028**

[B.A.] Computing & Informatics, [Minor] Technical & Professional Writing, [CUGS] Chinese

GPA: 3.90/4.0

Relevant Courses: Data Structures, Applied Database Technologies, Azure Cloud Computing, R (Language)

SKILLS

Data: pandas, matplotlib, seaborn, Jupyter Notebook, SQL/SQLite3.

Programming Languages: C++, C#, Python, HTML/CSS, JavaScript.

Software: Microsoft Excel/Word, Tableau Desktop/Public.

Foreign Language: Chinese

PROJECTS

Rowan University Admissions Trends Analysis, *Tableau + IPEDS data* **June 2026 – July 2026**

- Investigated ~10 years of IPEDS Rowan undergraduate admissions and financial award data, building 7 tables and 1 dashboard in Tableau on the impact of COVID-19, test-optional SAT policy, and the SFFA v. Harvard ruling.
- Found test-optional adoption was followed by an 8% fall in mean SAT scores and 226.9% increase in total unsubmitted SAT scores; COVID followed by 112% increase in institutional grants/scholarships (Fall 2020-23, $26,826,000 to $56,780,000 annually).
- Organized raw data from 9 annual Institutional Profiles records into long/tidy format Excel sheets and normalized SAT scores across via College Board concordance tables.

Nightreign End-of-Game Analysis *Python (pandas, matplotlib, seaborn)* **May 2026 – July 2026**

- Analyzed 100 randomly matchmade games with ~200 total players to identify 5 player/power-up combinations associated with ~75.4% higher win rates, excluding self-selected picks to reduce selection bias.
- Discovered 4 characters with the highest winrates, with highest being 87.5% of games.
- Recorded data in 11 CSV tables with up to ~388 rows and visualized findings in ~17 charts.
- Defined 13 technical terms in a glossary to describe game mechanics and clear confusion.

EXPERIENCE

Writing Tutor/AI Trainer, *DataAnnotation* (Remote Contract) **April 2026 – Present**

- Create and review prompts with concise criteria to judge AI responses.
- Cross-reference online sources to ensure AI responses are accurate and helpful.
- Write explanations of AI responses and document information discrepancies.

EXTRACURRICULAR

Member, *Association of Computing Machinery* (Club) **September 2025 – Present**
