Rowan University Board of Directors
201 Mullica Hill Road
Glassboro, New Jersey 08028

Dear Board of Directors,

We hope this letter finds you well. Enclosed along with this letter is the letter of recommendations that our team has proposed. The recommendations are for the wellness accessibility at Rowan University, using the \$10 million donation and following the criteria in the dossier.

The team has devised two recommendations: contracting more psychologists/therapists in the Wellness Center to increase mental health accessibility, and hiring slightly fewer psychologists in the Wellness Center but also renovating the Fitness Center with remaining funds.

We thank you for choosing us to consult you. Rest assured, both options make the most out of the \$10 million donation and hold the wellness of Rowan students first. Please don't hesitate to reach out to us with any questions or concerns.

Best regards,

Glassboro Technical Consulting Firm

Recommendations for Wellness Accessibility at Rowan University

Executive Summary

Company Description

Glassboro Technical Consulting Firm (GTCF) has the goal of advising and guiding any organization or institution, with several universities being our usual customers. Founded in 2026 by Dylan Sobieski, Elvis Lin, Karan Kumar, and Reston Weaver, our mission is to help companies make the most out of their potential and to help them make the best choices for them and their stakeholders.

The Problem and Recommendation

Rowan University received a \$50 million donation, \$10 million of which has been allocated to improving wellness accessibility in the institution. 37% of students face several depressive symptoms, and with mental health being an important aspect of living, the donation needs to be effectively utilized. GTCF has made the decision of contracting more psychologists in the Wellness Center, alongside renovating the Fitness Center on campus. The purpose is to increase accessibility to mental health resources and to promote physical wellness.

Marketability

This recommendation would place Rowan University as a leader in student wellness and accessibility. Rowan's brand would be reinforced in admissions materials and ranking after attracting students who prioritize their wellness. Student retention would also be improved as a result, earning more profit from tuition and boosting institutional success. Rowan University's reputation as a whole would develop along with its wellness accessibility and credibility.

Summary

Hiring more psychologists and renovating the Fitness Center will boost the overall satisfaction and retention of students. Therefore, Rowan University's standing will be improved and be viewed as a frontrunner of student success.

Introduction

Rowan University is committed to student wellness. Student wellness encompasses multiple facets of Rowan University, including mental and physical health resources as well as campus recreational activities. This generous donation will be put towards initiatives to enhance student wellness. It is of the utmost importance to the Glassboro Technical Consulting Firm to allocate these funds in the most effective and efficient manner regarding addressing student wellness. With great consideration, this report will recommend investing in more psychologists hired for the campus Wellness Center and renovations made to the Fitness Center.

Background

Mental health is of great concern among university students. According to the research by Eisenberg et al., in 2025, 37% of students reported moderate to severe depressive symptoms, with 18% of that group reporting severe symptoms. 32% of students report moderate to severe anxiety, 11% report suicidal ideation, and ¼ report feeling socially isolated (2025). It is important to have readily available mental health resources available for all university students. Among these resources should be ones that allow for walk-ins for easy access during emergencies.

While more clinicians would be beneficial, not every student may need one-on-one therapy. Psychologist Clara McCowan, PhD, states, "More centers are thinking creatively about how to meet the demand. Not every student needs individual therapy, but many need opportunities to increase their resilience, build new skills, and connect with one another" (Abrams, 2022, p. 13). Resources that could be implemented include workshops on topics such as time management or goal-setting; peer counseling for those struggling with adjusting to university or with low self-esteem; and an expansion of student activities such as clubs or recreational sports (Abrams, 2022, p. 13-14).

Requirements and Criteria

Cost:

- Recommendations cannot exceed \$10 million dollars, but should utilize the most of the donation.

Duration:

- Recommendations must be instated for a minimum of 5 years.
- Recommendations should be implemented within a reasonable time (~1 year).

Sustainability:

- Any recommendations cannot affect the environment negatively, and the cost of any offsets must be accounted for.
- Any changes should be scalable, expanding or not, based on changing needs from students.

Constraints:

- Recommendations must not require new buildings or new land to be acquired.
- Recommendations must only use pre-existing space and/or repurpose underutilized areas.
- Recommendations should adhere to Rowan University policies, including laws regarding private information (ex: mental health data).

Discussion of Options

Option 1: *Hiring more licensed psychologists for the Wellness Center*

Hiring more psychologists can increase the availability of the Wellness Center. The Wellness Center can be open for more hours and have consistent 24/7 support, especially for emergencies.

Option 2: *Invest in the Wellness and Fitness Center*

In addition to hiring more psychologists to manage the caseload of the Wellness Center, improvements will be made in the Wellness Center. Any exercise equipment in disrepair or that is out of date will be replaced. General renovations will be made across the facility, including the locker rooms, floor, lighting, and ventilation.

Comparative Analysis

Option 1: *Hiring more licensed psychologists for the Wellness Center*

- Accessibility: All students can have faster and more available access to the Wellness Center. This will allow for walk-in meetings for students and ease of access during emergencies.
- Cost: \$9.8 million dollars to hire 13 psychologists over a 5-year period.
- Ease of Implementation: The training/processing will take course over several months at most, including psychologists signing a 5-year contract. Overall, implementation should take under a year.

Option 2: *Hire more psychologists for the Wellness Center + invest in the Fitness Center*

- Invests in more than one area of Rowan University wellness.
- Investment in the Fitness Center would likely take longer to implement than investment in the Wellness Center.
- Similar level of accessibility: all students have access to these services.
- Would incentivize use of both services due to greater access to counseling and improvements made to the Fitness Center
- Same training/processing requirements for new psychologists as listed in Option 1, but will take less time due to hiring fewer than recommended in Option 1.
- Renovations of the Fitness Center may cause temporary closures of some areas. If approved, we would opt to have construction primarily take place during the summer months when fewer students use the Fitness Center on average.
- Renovations of the Fitness Center would only take place within the current property; the renovation process should not impact neighboring properties and lands.
- Renovations will include but are not limited to the following: locker rooms, floor, lighting, and ventilation; and purchasing and installing new equipment. Deteriorating areas in need of improvement will be torn down and remodeled. Any remaining funds will be reserved for maintaining the new renovations for 5+ years.

Summary Table

Options	Criteria 1: Accessibility	Criteria 2: Cost	Criteria 3: Ease of Implementation
Option 1: Hiring more licensed psychologists for the Wellness Center, around 13 or less	All Rowan students will have free and speedy access to Wellness Center professionals, with more than enough staff for appointments, walk-ins, and emergencies.	\$755,000 x 13 psychologists = \$9,815,000 over a period of 5 years. Cost is not a definitive amount but will not exceed the \$10,000,000 budget.	Several weeks to months for the hiring process/training period if approved. Psychologists will agree to a 5-year contract before signing on.
Option 2: Hire more psychologists for the Wellness Center and invest in the fitness center	All Rowan students will have access to the Wellness Center, with additional staff to help manage it, and the improved Fitness Center.	\$755,000 x 6 licensed psychologists = \$4.53 million \$150 x 17,000 sq. ft = \$2.55 million Fitness Center renovations \$2.825 million for new Fitness Center equipment Total Cost = \$9.905 millions The remaining budget would be saved for equipment repairs/replacements if necessary.	Several weeks to months for the hiring/training process. Psychologists will agree to a 5-year contract before signing on. Renovations could take about 6 months to a year to be fully completed. New equipment will be installed during renovations.

Recommendation

It is the recommendation of the Glassboro Technical Consulting Firm that option 2 would be a better allocation of funds than option 1. Option 2 takes a more holistic approach to wellness. Improvements and renovations to the Fitness Center will create a greater and healthier environment for students to practice their physical fitness. Improved ventilation systems will contribute to a healthier environment to work out in. New lighting will help create a welcoming environment and contribute to more pleasant workouts, and the new equipment will be state-of-the-art.

In addition to the renovations and improvements to the Fitness Center, the Wellness Center will have 6 new licensed psychologists hired. They will help Rowan students have quick and easy access to counseling and psychological services. Option 1 recommended 13 licensed psychologists hired. This would be helpful, but Rowan's Wellness Center employs 15 individuals who provide counseling and psychological services. Funds are best spent addressing multiple areas of wellness. Option 2 gives these people a hand in managing their workload, gives students greater access to counseling and psychological services, and addresses mental as well as physical wellness.
